20 July 1966

**MEMORANDUM FOR: Acting Comptroller, Special Activities**

**SUBJECT: Notification to OSA Field Units of FY-67  
Budget Items**

1. This is to confirm conversation this date between  and the undersigned wherein it was agreed that the Comptroller should send to  and to   relevant Agency and NRO FY-67 budget allocations for field units. A breakdown of fund elements should be made available to the field where feasible including such things as allocations for salaries, travel, (PCS and TDY), operations, maintenance, construction, communications, etc., etc.

2. It might be a good idea to inform the field units what our initial FY-67 submissions were as well as the approved FY-67 allocations made after higher authority review and approval. If the field units have the above information they will be in a position to better manage funds allocated and hopefully keep to a minimum requests for additional funds for unprogrammed items. With the transmission of this information to the fields, there should be a comment added that both Agency and NRO funding is tight
